PROFESSIONAL SUMMARY

DevOps Engineer with 2+ years of hands-on experience automating CI/CD pipelines, managing cloud infrastructure, and operating event-streaming platforms with **Apache Kafka**. Skilled in containerization, infrastructure as code, and observability. Improved deployment reliability and reduced costs through automation and proactive incident response. Strong collaborator who bridges development and operations teams to ship software faster and more safely.

TECHNICAL SKILLS

Streaming & Messaging	Apache Kafka (brokers, topics, partitions, consumer groups, Kafka Connect, Schema Registry),
Cloud Platforms	AWS (EC2, S3, IAM, VPC, RDS, Lambda, CloudWatch, MSK), Azure, GCP
Containers & Orchestration	Docker, Kubernetes, Helm
CI/CD	Jenkins, GitHub Actions
Infrastructure as Code	Terraform, Ansible, CloudFormation
Observability	Prometheus, Grafana, ELK Stack, CloudWatch
Scripting & Languages	Bash, Python, YAML
Databases	MySQL, PostgreSQL
Version Control	Git, GitHub, GitLab
Operating Systems	Linux
Networking	DNS, Load Balancing, TCP/IP, VPN, Firewalls

PROFESSIONAL EXPERIENCE

DevOps Engineer

Tech Mahindra

2+ years
India

- Operated and tuned **Apache Kafka** clusters (topic design, partitioning, replication, and consumer-group management) supporting real-time data pipelines across multiple services.
- Built **Kafka Connect** pipelines and managed schemas via Schema Registry to reliably stream data between source systems and downstream consumers.
- Automated CI/CD pipelines with GitHub Actions and Jenkins, integrating automated testing, image scanning, and rolling deployments to Kubernetes.
- Supported migration of on-premises applications to AWS,
- Built Docker images and managed container registries for development and staging environments.
- Set up centralized logging with the **ELK Stack** and metrics/alerting with **Prometheus + Grafana**, improving mean time to resolution.
- and **Terraform** modules to standardize server and cloud-resource provisioning across environments.
- Configured and maintained Linux servers, including patching, user management, and performance tuning.

PROJECTS

Real-Time Streaming Pipeline with Kafka

Designed an event-streaming pipeline using Apache Kafka and Kafka Connect, with monitoring of consumer lag and broker health via Prometheus and Grafana for proactive scaling.

Automated CI/CD Pipeline

End-to-end pipeline (GitHub Actions → Docker → Kubernetes) with automated testing, image scanning, and rolling deployments; Slack notifications for build status and deployment approvals.

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02)
- AWS Certified Data Engineer
